

*For high quality lasers,
Beam profiler is necessary.
"LaseView" is the answer.*

For developing LiDAR module...

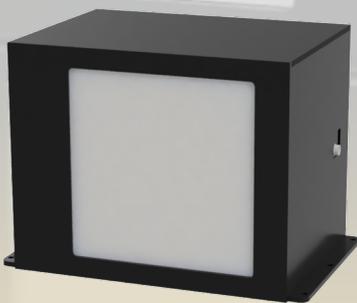

For measuring laser processing beam...

For large FOI laser such as VCSEL...

Any new application, contact us!

New Products

LaseView-LHB-200

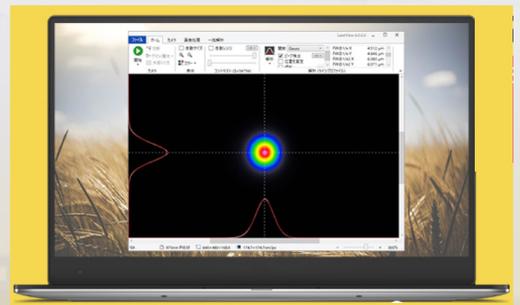

The world largest are up to 200mm square.
Suitable for LiDAR applications.

LaseView-LHB-UHP

Ultra high power resistant up to 100kW/cm².
Suitable for laser processing applications.

LaseView subscription service

Very convenient to measure beam profile by providing license only 100 USD per month!
